Korea Social Value and Solidarity Foundation

Korean government's strategy for promoting the social economy

Announcement for the 'Social economy promotion strategy' (18 Oct 17, Korean government inter-agencies)

The first social economy strategy established at the government level

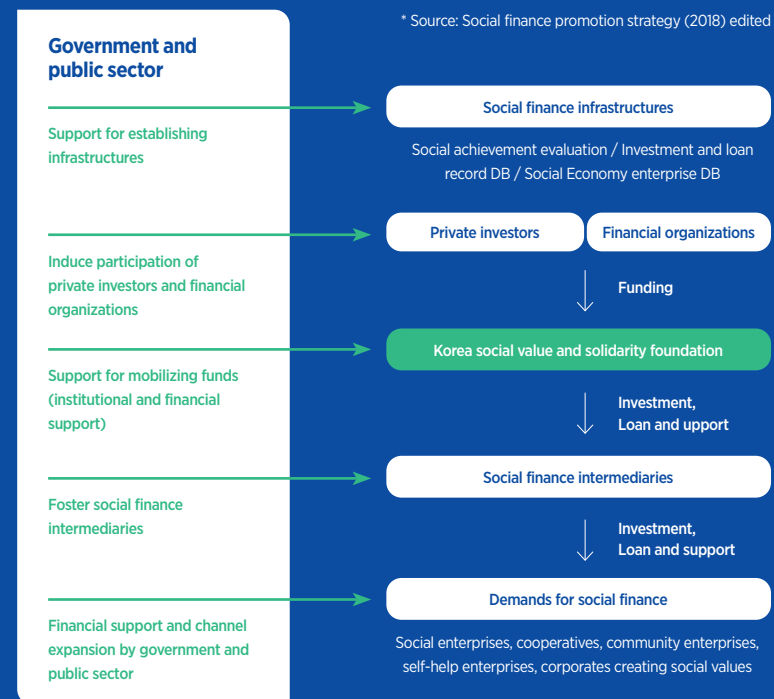

Core implementation strategy _____strengthen financial infrastructures for social economy enterprise such as social startups to start and expand their business / enhance tailored support according to the development stages of social economy enterprise and support for expanding scale / leading other public agencies' participation in market access support such as socially responsible public procurement / support social economy enterprises to enter major sectors such as renewable energy

Announcement for the 'Social finance promotion strategy' (8 Feb 18, Korean government inter-agencies)

Implementation strategy for establishing a financial ecosystem that backs sustainable growth of the social economy

Core implementation strategy _____(support social finance market establishment) Social value fund mobilization support, nurture social finance intermediaries and increase private investors -financial organizations' participation / (expansion of social finance provisions from government and public sector) increase support scale and channels for social economy enterprises through government and public resources / (expansion of social finance infrastructures) establish financial support information DB, utilize social finance intermediaries and capacity building by government and public sector, establish social achievement evaluation system

Strategy for establishing the social finance ecosystem

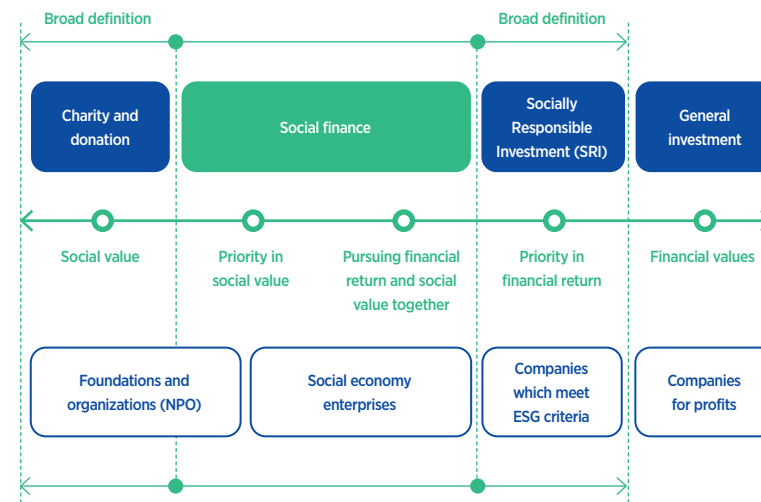

We need social finance for the sustainable growth of social economy enterprises

Social finance is a form of finance which pursues the realization of social value together with financial return.

Narrowly _____it means provision of finance through investments, loans and guarantees for social economy enterprises to create social values.

Broadly _____it includes not only investments, loans and guarantees but also grants and philanthropies as well as Social Responsible Investments (SRI) which focus on companies meet ESG (Environment, Social and Governance) criteria by broadly interpreting social values.

Global social finance market which solves social problems and making profits is rapidly expanding

UK, USA and Japan established a social finance ecosystem based on government and public resources (from dormant accounts) and Europe which has a strong tradition of cooperatives, spontaneously developed a civil society led social finance supporting system.
